*Update frequency:

Realtor.com related sites can take up to 5 days to receive and upload the data from the MLS.

Company sites receive the data and post within 24 hours, unless there is a data feed issue.

All other sites take 48 hours to 5 days for posting from the MLS or source sites.

We are not able to control the quality of the data being passed between sites that we do not own such as sites powered by Realtor.com,

oodle.com, geebo.com, etc. We also cannot control and have very limited support for which listings are displayed and how they are searched and what results display.
